CHOSEN BY PROFESSIONALS WORN BY YOU

KEELA

What do you want in high performance clothing?

Setting up the company some thirty years ago, this was the question I asked myself. I wanted to be different, to find new solutions to old problems, to deliver the best products possible using the most modern techniques available. We did this then. We do this now. We will do this tomorrow.

Our watchwords remain:
Innovation. Quality. Technology.

Rube — Managing Director and Founder of Keela

How Keela Was Made

Keela was born over 30 years ago, when our Director Rube realised that we could provide high-quality technical outdoor-wear with a base here in the UK – and of course he thought we could do it better than anyone else!

Over the years we have become known for pushing the boundaries of innovation, and with our range of testing machinery and skilled teams of designers and engineers this continues to be something we work on.

1973 — Company Founded
It all started here!

1980 — Repair Centre Opened
The base of our Keela Rebuild programme started here

1989 — Keela Founded
The Keela brand is born, following the principles of Innovation, Quality, Technology

2001 — Tape Sealed Fleece
Keela launches the world's first fully tape sealed fleece jacket.

2005 — Tsunami School
Following the Asian Tsunami disaster, Keela rebuilds a primary school in Sri Lanka.

2006 — The Queen's Award for Innovation
Our sister company is awarded a Queen's Award for Innovation for their work on Advanced Construction Technology (A.C.T) in garment and material construction.

2008 — The Queen's Award for Innovation (again!!!)
A year of recognition for System Dual Protection culminates in The Queen's Award for the SDP technology for its improvement in garment performance - the only fabric system in the world to achieve this accolade.

2011 — Recycling Scheme Launched
The scheme allows our contract customers to securely recycle their used garments.

2014 — Keela Focuses on Sustainability
We launched our 5R's programme throughout our manufacturing process, and signs up to various initiatives aimed at improving sustainability.

2015 — Heritage Range Launched
Our long-awaited Heritage range was launched, bringing together classic designs, British fabrics, and for one item full UK manufacturing.

2020/21 — UK Manufacturing
Our UK manufacturing was expanded and committed to production of gowns and PPE for the NHS during the pandemic. Producing over ¾M gowns in Scotland.

2022 — UK Government Early Day Motion for Covid efforts.
Awarded Civic Award from Fife Council, Finalist for Family Small Business and Finalist for Fife Council Business Awards.

Keeping it Real

As an outdoor company we're passionate about making sure the world we live in stays as pristine as it possibly can.

The road to sustainability is a long one, but we're constantly looking to improve, and as part of our approach we follow the "5 R's".

Reduce
We are working to reduce waste wherever we possiblty can. Whether that is by reducing our clothing pattern fabric consumption, the reduction of packaging or limiting travel abroad.

Rebuild
Since the 80's we've had our Keela Rebuild repair programme, allowing well-loved clothing to be given a new lease of life, meaning they can be enjoyed for longer. A small tear can be enough to put a jacket to landfill, but a small repair can mean that jacket can carry on for years more.

Recycle
Recycling is one of the easiest things we can do as a company. Where possible we recycle what we can, ensuring all areas of our workplace have recycling points; we also use recyclable packaging, and are looking to increase our use of recycled materials.

Respect
At the basis of what we do, we ensure we have respect for all around us. A respect for the planet, our resources, our team and our customers. We aim to do as much as we can, from restoring local walking paths to ensuring our supply chain is ethical and sustainable.

React
The world of outdoor-wear is constantly changing, and we want to make sure we can be reactive to this. As more innovative fabrics and components come out, our team explore whether these could be an appropriate and more sustainable alternative for our products. Whether we are moving away from harmful chemicals, or moving towards ethical alternatives in materials, we're always looking to improve.

Interested in knowing more about our Keela Rebuild programme?

At our UK HQ our team can fix lots of different problems, and have access to a full range of testing equipment to ensure all products we send out are suitable for use.

Some of the things our skilled team can do include;

- Zip replacement
- Tear fix (with a patch)
- Pocket replacement
- Panel repair
- Removeable hood replacement
- Velcro® replacement
- Stud replacement
- And lots more!

Chosen by Professionals Worn by You

We're proud that our clothing is trusted by professionals around the world, including rescue teams who battle the toughest conditions to save lives.

We work with a number of trusted partners who give our kit a run for its money, taking it out and about in the worst weather and testing it to the limits and back again – this lets us make sure that what we provide you is the highest quality, and won't let you down.

Andy Howard
Nature Photographer

“I've been a Keela clothing partner for over two years now and I can't recall a day I haven't worn at least one of their garments. And I'm not just wearing them because of our agreement – I genuinely believe they make the best kit available.

I still rely on my Keela kit to perform day in and day out, and I have so much confidence in the garments I don't ever worry about anything the Scottish weather can throw at me. I have absolute peace of mind knowing I've got the correct gear for the conditions.

So, as I've said before I don't believe you can really blog about gear until you've really put it through its paces, and I don't mean a weekend trip to the Lake District, I'm talking about daily wear and tear by wearing and challenging the gear for almost a year, crawling, lying, sitting and walking in the locations as extreme as the Cairngorms, Shetland, Mull.”

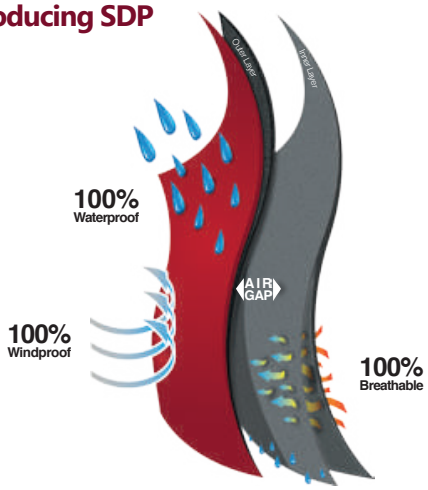
- Shockcord with cord locks at hood, waist and hem

Introducing SDP



Our System Dual Protection uses an air gap which can trap warmth, and also allows moisture to evaporate into this space – so you're not left feeling clammy when it's raining and moisture can't escape.

Read more on page 66

Deep Forest Air Force Blue Claret

Cuillin Jacket
00200

Designed with simplicity the Cuillin SDP Jacket allows you to pursue different experiences whether you are powering up a peak or hiking through the forest. Its lightweight shell provides waterproof, windproof and breathable protection, while our SDP lining helps control condensation. Providing high performance protection in a diverse range of conditions this style is your go to jacket.

Black Wolf Grey Moss Persian Blue Red/Black

Pulse Microfleece
30040

A great mid layer fleece. Light enough for summer use, it also works well in colder climates too.

Black Wolf Grey Moss Berry Calypso Navy Red/Black

Women's Pulse Microfleece
40040

Cut for a female-specific fit. It has a high warmth-to weight ratio, is light and takes up almost no room when you're not wearing it.

FEATURES

- ½ zip at collar for ventilation
- Slight scoop at back
- Quick dry
- Easy care
- Works well as mid or base layer
- Flat lock seams improve comfort and fit
- High warmth to weight ratio
- Light, soft and compressible for easy packing

Breathable

FABRIC: Zetland Micro
SIZES: 2XS-3XL

Zetland

Zetland

Black Green/Moss

Genesis Waterproof Fleece
31630

An award-winning fleece that uses cutting-edge technology, like its highly-breathable hydrophilic lining, to cocoon you against the elements. A favourite with mountain rescue teams

FEATURES

- Neck baffle
- Reinforced shoulders and elbows
- Zipped hip pockets
- Articulated sleeves
- Elasticated cuffs
- Shockcords with locks at hem
- Fully tape sealed

Waterproof Windproof Condensation Control Pockets

FABRIC: Zetland 100
LINING: Innovation XL
SIZES: XS-3XL

Zetland

Navy

Genesis Travel Fleece
31630

A version of our Genesis Waterproof Fleece Jacket without the shoulder reinforcement for those looking for a softer less technical looking outdoor waterproof fleece jacket but with the same level of warmth and weather protection. It also has added studs at the neck for attachment of an optional hood (not included).

- Waterproof/windproof
- Breathable
- Condensation control
- Neck baffle
- Zipped hip pockets

The Benefits of Insect Shield

And why does it matter to you?

Safe for Everyone to Use
Including children and pregnant women, and it can't be swallowed

No Reapplication
The active ingredient in Insect Shield is so tightly bonded to the fabric fibres that it remains effective through the life of the product

Environmentally Friendly – It's designed to prevent loss of the active ingredient outside of the system, unlike other fabric treatments which require wastewater management

Convenient and Easy Care
It's invisible, odourless and suitable for home laundering

Effective on a Variety of Insects
Including flies, chiggers, midges, ants, mosquitos, ticks and fleas – which carry Lyme disease, West Nile virus and Malaria

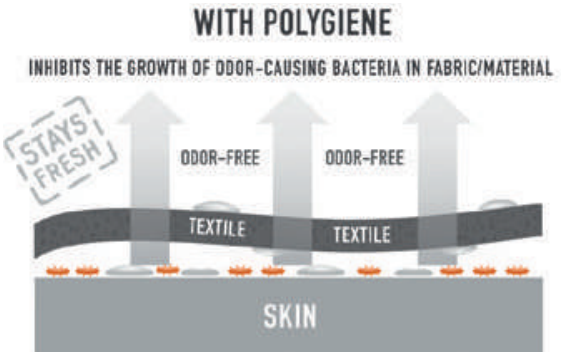
ViralOff
POLYGIENE TECHNOLOGY

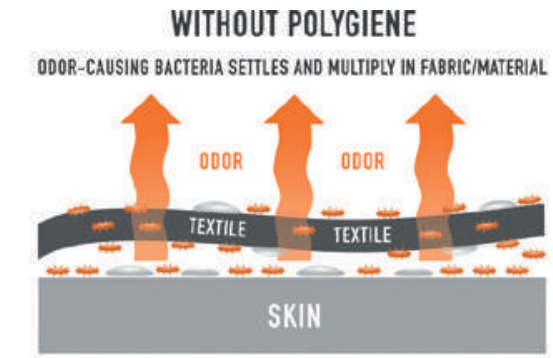
Polygiene started in the care segment during the fight against SARS in 2004.

Polygiene ViralOff™ is a treatment has a 99% reduction of viruses, in a textile or material, over two hours, according to a standard ISO18184:2019 test.

It can be worn against the skin, is durable and an always on treatment. For best performance and sustainability, wash less and only when needed.

While ViralOff is particularly relevant in the Coronavirus Pandemic situation, it will also be a longer term solution to enhance hygiene





Carbon Blue Marl Tan 499

Trail Top L/S
29300

An ideal first layer for hikers, mountaineers and anyone who needs a wicking base layer - it also includes ViralOff treatment. The top is designed to work in tandem with technical mid-layers and shells, and it also has an anti-bacterial component to reduce sweat smells.

This makes it ideal for use while travelling, or just while you're out and about.

STRETCH-TEC

Designed to help keep you warm in cold weather, and cool in warmer weather with its unique natural properties.

Highly Breathable
Merino wool is one of the most breathable fibres. Merino fibres can absorb large quantities of moisture vapour and move it away from the body.

Antibacterial
Merino wool has natural antibacterial properties (so it has a natural resistance to odour caused by sweat). When active, your body naturally produces sweat developing bacteria, which will cause odour. Odour molecules are then absorbed into the merino fibre, effectively becoming trapped and less readily detected by the human nose.

Wash less
It has a natural protective outer layer, which helps prevent stains from being absorbed. This means you get many more wears per wash; great for expeditions, saves time washing and not to mention the positive environmental gains to be achieved from washing less.

Regulates Body Temperature
It is a technically active fibre, which has the ability to gain and release heat depending on your next-to-skin environment and the external conditions. So it helps you stay warm when the weather is cold, and cool when the weather is hot.

Wrinkle Resistant
At microscopic level, each Merino wool fibre is like a spring that returns to its natural shape after being changed. This gives Merino wool garments a natural resistance to wrinkles.

100% Biodegradable
When a wool fibre is disposed of, it will naturally decompose in soil in a matter of years.

UV Resistant
Merino wool clothing provides good protection from the sun, compared with the protection from other fibres. As a natural fibre, Merino wool absorbs UV radiation providing protection from the sun. This makes it a good choice for any outdoor activity.

I've been a member of the Keela team for over 20 years. As a mother, I wanted to ensure that our Keela youth range gave exactly the same comfort and protection as our adult range.

Before the kids took their first steps we had them clad in Keela, and now in their teens they have grown up with Keela protection for all their adventures, whether larking around in the woods or climbing a Munro.

Kate — Keela Team Member and Mother of Two

Wolf Grey Fire

Youth Solo X

ENGINEERING
HERITAGE
UK FABRICS
BUSHCRAFT

Heritage & Bushcraft Range

Our Heritage range encapsulates the best of British Heritage, engineering and textile construction, offering a small, highly technical collection of clothing designed and manufactured for the Bushcraft and Survival market.

UK Manufacturing

We want to support UK manufacturing, so as part of this our Harris Tweed Smock is entirely manufactured in our UK HQ. From fabric cutting to assembling components, our skilled team do all the work here.

UK Fabrics

We have used as many UK fabrics in our range as possible, including Harris Tweed straight from the Isle of Harris, Ventile fabric which is well known for its high-quality cotton, and fabrics from British Millerain based in Lancashire.

Designed for the Forests

Our Heritage range is designed to fit in perfectly in the forests and fields, featuring useful additions such as fire steel loops, reinforced panels and a multitude of pockets for storing everything from a compass to a map.

SEE THE FULL RANGE

If you're interested in finding out more about our full Heritage & Bushcraft range, just contact us at:

sales@keela.co.uk

and we can arrange to send you one of our specialist catalogues.

Ventile

Ventile® was created to save the lives of Air Force personnel flying over the Atlantic in wartime England. Pilots needed a garment that was cool and comfortable in the cockpit, but warm and impenetrable if it came into contact with water. Nothing offered this functionality on the market, so after several months of testing, Ventile® was born.

Ventile® extended life expectancy in the sea tenfold, which made rescue a real possibility. 80% of pilots who fell into the sea would now survive.

Falkland Country Jacket
00210

The classic heritage fabric, Ventile, combined with our ADS microlaminate, creates a tough, durable and almost completely silent jacket. This range is favoured by survival experts; who almost live in theirs.

Ventile

Ventile Heritage Smock
03000

Combining 100% pure cotton Ventile fabric with ADS laminated liner, the Ventile smock offers complete protection while remaining almost completely silent.

Harris Tweed Smock
03010

Developed in partnership with Woodland Ways, the Smock combines a Harris Tweed body with British Millerain Stay Wax Cotton panels; creating an attractive water and wind resistant jacket which features a unique built in fire steel loop.

Orkney Jacket
00220

The Keela Orkney Jacket is a Wax Cotton Jacket featuring our SDP lining. The Wax Cotton is naturally weather repellent, but the added SDP will ensure this jacket will keep you warm and dry no matter what the weather.

Heritage Scuffer Trousers
11030

With all of the water-resistance and durable properties of the Scuffer, but in colours complementary to the rest of our Heritage range, the new Heritage Scuffer Trousers are ideal for use in the forests and fields.

Heritage Trousers
13000

The Keela Heritage trousers are durable and comfortable, perfect for the everyday adventurer. Along with water and wind resistant fabric, the trousers feature British Millerain Stay Wax Cotton panels at the knee and inner leg.

REINFORCED
FAST WICKING
FLAT SEAMS
ELASTICATED

Carbon

Primaloft Expedition Sock
60250

Ideal for the harshest conditions. The PrimaLoft® Silver and MerinoWool blend offers comfort, antibacterial properties, enhanced warmth and performance.

FEATURES

- Heavyweight sock
- Fully cushioned in Primaloft/Merino yarn for warmth and comfort
- Ventilation channels for breathability
- In-turned welt for a relaxed comfortable fit
- Cordura reinforced heel and toe for extra durability
- Isofil sole wicks moisture and keeps feet dry
- Elastic grip sections for fit and support

FABRIC: Primaloft and Merino Blend
SIZES: S, M, L

PRIMALOFT

Covert Green

Glacier Sock
60240

Ideal for the harshest of conditions. The Merino Wool blend makes the Glacier ideal for all cold weather activities.

- Cordura® reinforcement at heel and toe
- Full calf length
- In-turned welt for a relaxed, comfortable fit
- Elastic grip sections for fit and support
- Ventilation channels for breathability
- Fully cushioned in Merino wool for warmth and comfort
- Fast wicking sole to keep feet dry
- Fine toe seam to reduce abrasion

FABRIC: Merino Blend with Cordura
SIZES: M, L, XL

Khaki

Crevasse Sock
60280

The Keela Crevasse sock is a mid calf length version of the Glacier sock. A top of the range sock, ideal for the harshest of conditions.

- Cordura® reinforcement at heel and toe
- Mid calf length
- In-turned welt for a relaxed, comfortable fit
- Elastic grip sections for fit and support
- Ventilation channels for breathability
- Fully cushioned in Merino wool for warmth and comfort
- Fast wicking sole to keep feet dry
- Flat linked toe seam to reduce abrasion

FABRIC: Merino Blend with Cordura
SIZES: S, M, L, XL

Charcoal Khaki

Insect Shield Socks
62200

Cushioned socks with added Insect Shield repellant, so they'll protect you from bugs.

- Insect Shield treatment
- Cushioned sole for comfort

SIZES: M, L, XL

Black

Pola-Cap
60860

Complete water and wind protection. It combines Rainlife 5000 outer fabric with a fleece lining, to keep you warm and comfortable.

Moss Black White

Extreme Gloves
65210

These Primaloft® insulated winter gloves offer you the warmth you want.

Red Black Tan499 Umber Teal Steel

Neck Tube (ViralOff)
60864

Can be worn in an array of different ways to give additional protection where you need it; and the microfibre material manages moisture and protects from the outside elements.

FEATURES

- Waterproof & breathable
- Wired peak
- Ear guards
- Button hole on ear guards for attachment of straps
- Elasticated at back
- Adjustable back
- Fully seam sealed

RAINLIFE

FABRIC: Rainlife 5000
LINING: Zetland Micro
SIZES: M/L

Zetland

- Elasticated wrist
- Bottom cuff toggle adjustment
- Clip to join gloves
- Pre curved fingers
- Soft nose wipe
- Touch screen finger
- Grip palm
- Primaloft® padded

INNOVATION 5

PRIMALOFT

FABRIC: Innovation 5
SIZES: S, M, L, XL

- Soft material for comfort against skin
- Can be worn in a variety of ways – ***scarf, head band, cap, mask, hat, hairband, hood, wrist band***

SIZES: One Size Fits All

ViralOff POLYGIENE TECHNOLOGY

Black

Brace Set
61000

Support your trousers with this reliable loop brace set with clip adjusters.

- For use on :
  Men's Alpine Trousers (14190)
  Ladies' Iona Trousers (44201)
- Salopette clips
- Adjuster buckles
- Snaps

SIZES: One Size Fits All

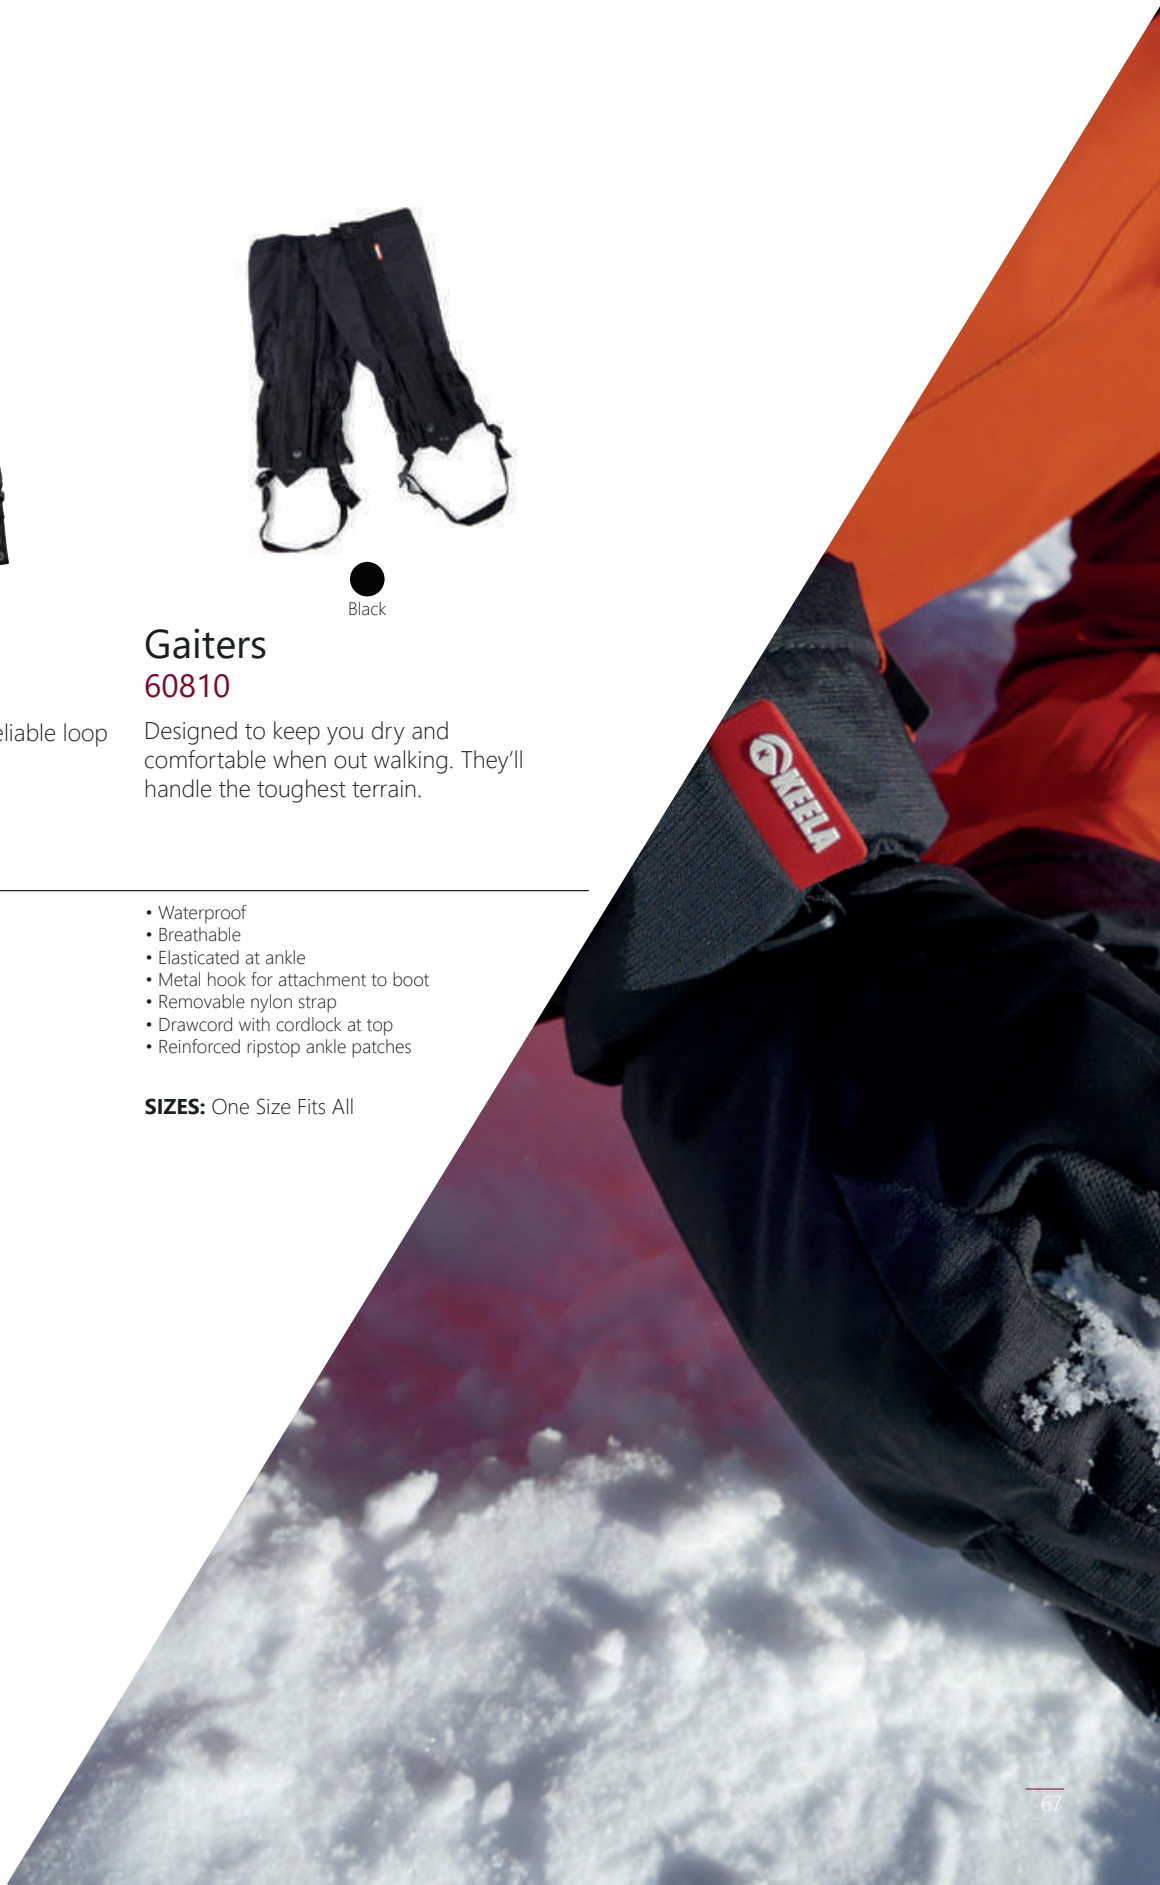
Black

Gaiters
60810

Designed to keep you dry and comfortable when out walking. They'll handle the toughest terrain.

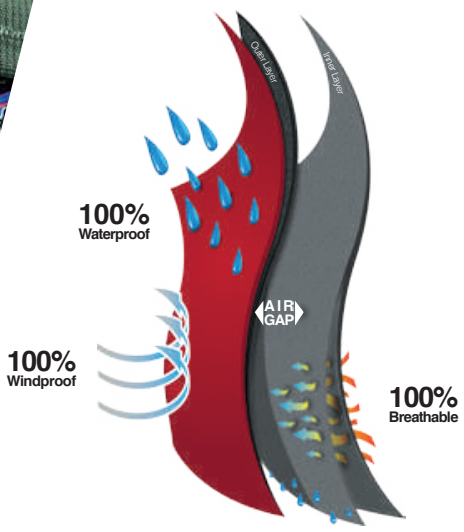
- Waterproof
- Breathable
- Elasticated at ankle
- Metal hook for attachment to boot
- Removable nylon strap
- Drawcord with cordlock at top
- Reinforced ripstop ankle patches

SIZES: One Size Fits All



“System Dual Protection is more than just another fancy fabric brand. It’s the only performance fabric in the world to be awarded a Queen’s Award for Innovation and to be highly commended by the Home Office Scientific Development Branch.

Maybe that’s why it’s the fabric system of choice for all outdoor professionals.”



System Dual Protection®

The world's only waterproof performance clothing technology that manages inner condensation in wet and cold conditions.

We're proud of the achievements of our System Dual Protection (SDP). It's the world's only waterproof performance clothing technology that manages inner condensation in wet and cold conditions. Which means it's the fabric you want next to your body when you're out there challenging yourself.

It's such a good product that we received The Queens Award for Enterprise: Innovation in 2008. This award is one of the UK's most prestigious awards that recognises outstanding achievement in the field of international trade, innovation and sustainable development.

All these accolades mean just one thing: you can stay out for longer and remain more comfortable when you're wearing kit that has our SDP in it. No other fabric is as good at keeping you dry from external elements while also keeping you dry by wicking perspiration away from your body.

The Technical Bit

SDP is a unique double-layer fabric system with an air gap. The tough, durable outer layer ensures it can handle wear and tear, while a lightweight inner layer offers comfort and creates the air gap to build up warmth. SDP is 100% waterproof, breathable, warm and reduces inner condensation to keep the wearer protected.

SDP was developed in the harshest conditions to prove that it works. It's now used by tactical forces,mountain rescue teams and the emergency services. The sort of people who demand technical clothing that performs under pressure – much like they do themselves.

In short, System Dual Protection provides unrivalled waterproof protection and comfort in all conditions.

How Does Our SDP System Work?

The simple, no-technical explanation is that our system is waterproof and breathable, so it keeps you warm, dry and comfortable. If you're looking for the technical reasons, buckle up – here we go.

We use an outer layer and an inner layer, with an air gap in between that helps retain heat. The outer layer is breathable, the inner layer is highly wicking, which draws moisture away from your skin and into the air gap.

The combination of the air gap and wicking process regulates body temperature, minimising overheating when active and shivering during inactive periods, keeping you comfortable and safe.

It's a technology that we're justifiably proud of. And winning **The Queen's Award for Enterprise: Innovation** only goes to underline its importance for so many of these users across the world.

If you want the ultimate protection when you're in the great outdoors, you want to be wearing Keela.

Dress with the Best

Keela garments are designed to go beyond the extraordinary – they will become trusted companions for your journeys and adventures. But for that to happen, they need to be exceptional. One look at Keela kit and you will see the care that goes into their manufacture. From sourcing the highest quality materials and trims, to sharp modern designs, to precision seams and seals, our engineers, designers and production team are committed to authentic materials, craftsmanship, and impeccable standards.

R & D: Innovation is in our DNA

The innovations needed to guarantee that each and every product has enhanced performance do not come easy.

We have developed and engineered numerous new technologies, with each new garment – and each new garment component – subjected to thousands of rigorous laboratory and real-world tests.

Quality and reliability are the cornerstones of everything we do. But we go further still. Take our development of a new ultrasonic seam for example. No existing test could assess its superior performance over an unparalleled range of environmental conditions. So we designed and built an entirely new test platform, the H230…. a machine uniquely capable of testing fabrics and seams for abrasion, flexing and torque whilst mimicking varying environmental conditions.

The Ultimate tester

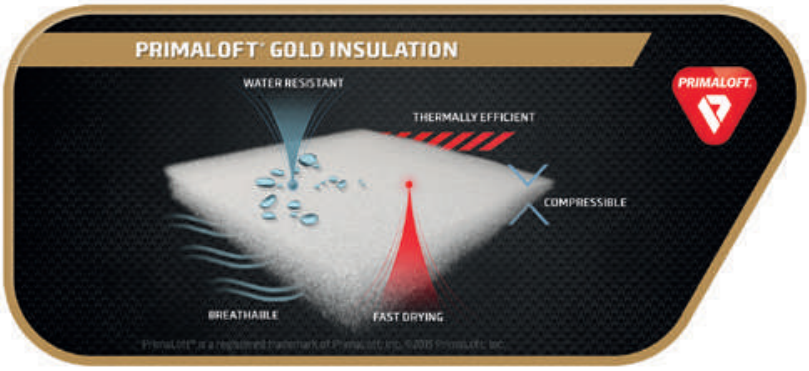
That would be you, because it really is all about you. You are the ultimate tester. Every milestone achieved, every ascent summited, every journey completed… you tell us your stories and we listen and we innovate.

What is Primaloft?

Primaloft are market-leading experts in performance insulation. Engineered to be highly performing, Primaloft insulation keeps you warmer, softer and drier – boasting accelerated dry times, enhanced breathability and a superior hand-feel and softness – and unlike Down insulation, Primaloft retains it's ability to keep you warm even when wet.

What Sets Primaloft Apart

- Primaloft insulation features the smallest fibres in the industry - less than one denier.
- Smaller fibres trap greater quantities of air, resulting in superior thermal performance and a softer feel, just like real goose down.
- Tiny Fibres create a very tight surface tension that causes water molecules to bead up on the surface of the insulation.
- Primaloft fibres also compress significantly more than other insulations.



Primaloft Keeps You Warm Even When Wet

Primaloft fibres are permanently coated with a treatment which dramatically reduces the amount of moisture the fibres can absorb, while making them water-repellent. The fibres absorb approximately 100-250% weight in water, while typical polyester insulations gain from 400-1000% their weight in water.

When fibres absorb moisture they conduct heat away from the body much faster than dry fibres. Because Primaloft fibres absorb a reduced weight of water Primaloft insulation maintains the highest percentage of warmth when wet over other insulations.

INNOVATION 5
INNOVATION 6
INNOVATION 8
INNOVATION 10

Innovation 5, 6, 8 & 10

Innovation fabric is designed for the highest hills and tallest mountains. Developed to be the last word in high end waterproof/ breathable performance fabric, the Innovation range is most often found in combination with our System Dual Protection technology due to its ideal compatibility and usability.

INNOVATION XL

Innovation XL

Used in our waterproof fleece range, Innovation XL provides warmth and comfort with the added benefit of being 100% waterproof and windproof. Takes everything that nature can throw at it.

PROSTRETCH

ProStretch

Gives you freedom of movement, so it's perfect for high-impact sports. It's a waterproof, windproof and breathable fabric that offers four-way stretch.

Ventile

Ventile

Uses natural methods to weave 100% cotton to achieve weatherproofing. The dense weave of the material and the way it swells when wet creates a natural fabric that's windproof, highly breathable, durable and almost silent.

RAINLIFE

Rainlife 2000, 5000

A great all-rounder. It's lightweight and ideal as your outer layer when you want to stay dry. It gives you waterproofing and breathability to let you stay outdoors no matter what the weather says.

FLYLITE RIPSTOP
FLYLITE AQUA
FLYLITE AIR
FLYLITE ULTRA

Flylite Ultra, Ripstop, Aqua, Air

The Flylite fabric range has been developed to protect against the elements while adding minimal weight. These ultralight fabrics are tough, wicking, wind and water resistant with great strength to weight ratio. Flylite Ripstop is ideal where something a little more durable is needed. With Ripstop construction this 100% nylon fabric is hard wearing, even in the harshest terrain.

ViralOff
POLYGIENE TECHNOLOGY

ViralOff

Polygiene ViralOff™ is a treatment has a 99% reduction of viruses, in a textile or material, over two hours, according to a standard ISO18184:2019 test. It can be worn against the skin, is durable and an always on treatment. For best performance and sustainability, wash less and only when needed.

MERINO

Merino

Merino wool is one of nature's most comfortable fabrics. It lets you warm up quickly and, because of the exceptional breathability of merino wool, you'll not overheat. So merino wool garments are ideal for almost all activities. You'll look good and you'll definitely feel good.

Zetland

Zetland 100, 200, Micro

The Zetland range is the ideal fleece fabric for any outdoor activity. Soft touch yet hard wearing, this 100% polyester fabric is tightly knitted, providing excellent thermal properties and insulation. All the fabrics within this range are non pill, easy-care, high wicking and quick dry.

System Dual Protection®

System Dual Protection

System Dual Protection (SDP) is the world's only waterproof performance clothing technology that manages inner condensation in wet and cold conditions.

insect shield® repellent technology

Insect Shield

With Insect Shield your clothes protect you against insects. Including those that can carry Lyme disease, West Nile virus, Malaria and many other diseases. And the protection lasts. The active element in Insect Shield is so tightly bonded to the fabric that it retains effective repellancy through the life of the product (around 70 washes). Show the bugs who's boss.

AIR XTREAM

AirXtream

A combination of materials brought together in one performance system. The outer woven stretch component is treated with a highly durable water repellent finish and then bonded to a hydrophilic membrane. The final component is the lining, which absorbs the moisture and reduces condensation.

AQUAFLEX

Aquaflex

Aquaflex is a moderately lightweight 3-layer waterproof fabric which is also breathable – with Aquaflex Extreme combining these properties with a more robust and durable finish for the perfect outdoor fabric.
